

Disease: Paralysis (brain hemorrhage)
Symptoms: nausea, fatigue, cough
Treatment: Emergency care, physical therapy, blood clot treatment
Hospital: Neuro & Stroke Specialty Hospital

Disease: Hypertension
Symptoms: vomiting, cough, weight loss, yellow eyes
Treatment: Lifestyle modification, antihypertensive medication, regular monitoring

Disease: Hepatitis B
Symptoms: vomiting, fatigue, joint pain, cough
Treatment: Antiviral medication, liver monitoring, supportive care

Disease: Impetigo
Symptoms: headache, joint pain, skin rash
Treatment: Topical antibiotics, oral antibiotics for severe cases

Disease: Chronic cholestasis
Symptoms: headache, vomiting, joint pain, yellow eyes
Treatment: Ursodeoxycholic acid, vitamin supplements, liver care

Disease: Hepatitis C
Symptoms: headache, vomiting, fatigue, weight loss
Treatment: Antiviral therapy (DAAs), liver monitoring

Disease: Typhoid
Symptoms: nausea, vomiting, fatigue, cough, weight loss
Treatment: Antibiotics, fluid replacement, rest
Hospital: General Medicine Hospital

Disease: Dimorphic hemorrhoids(piles)
Symptoms: skin rash, cough, weight loss, yellow eyes
Treatment: Dietary fiber, topical treatments, surgery if severe

Disease: Vertigo (Benign paroxysmal Positional Vertigo)
Symptoms: vomiting, joint pain, yellow eyes
Treatment: Canalith repositioning maneuvers, vestibular rehabilitation, medication

Disease: Cervical spondylosis
Symptoms: fever, nausea, vomiting, weight loss, yellow eyes
Treatment: Pain relievers, physiotherapy, neck exercises

Disease: Tuberculosis
Symptoms: fever, headache, skin rash, cough, weight loss
Treatment: Antibiotics (6–9 months), DOTS therapy
Hospital: Infectious Disease Hospital

Disease: Hyperthyroidism
Symptoms: fever, vomiting, joint pain, cough
Treatment: Antithyroid medication, radioactive iodine therapy, surgery if needed

Disease: Malaria
Symptoms: headache, joint pain, cough, yellow eyes
Treatment: Antimalarial drugs, hydration, supportive care
Hospital: Tropical Medicine Hospital

Disease: Gastroenteritis

Symptoms: headache, vomiting, joint pain, cough, weight loss
Treatment: Oral rehydration solution, rest, antibiotics if bacterial

Disease: Osteoarthritis
Symptoms: cough, weight loss, yellow eyes
Treatment: Pain relievers, physiotherapy, lifestyle modification

Disease: Heart attack
Symptoms: nausea, vomiting, joint pain, weight loss
Treatment: Emergency care, angioplasty, blood thinners, lifestyle changes

Disease: Dengue
Symptoms: vomiting, skin rash, cough
Treatment: Fluid replacement, pain relievers (avoid NSAIDs), monitoring platelet count

Disease: Pneumonia
Symptoms: fever, headache, joint pain
Treatment: Antibiotics (if bacterial), rest, fluids, oxygen therapy if needed

Disease: Urinary tract infection
Symptoms: fatigue, skin rash, weight loss
Treatment: Antibiotics, hydration, pain relievers

Disease: Hypoglycemia
Symptoms: headache, nausea, vomiting, cough, yellow eyes
Treatment: Glucose intake, medication adjustment, dietary management

Disease: Bronchial Asthma
Symptoms: headache, nausea, cough
Treatment: Inhalers (bronchodilators, corticosteroids), allergen avoidance

Disease: Arthritis
Symptoms: fever, vomiting, fatigue, cough
Treatment: Anti-inflammatory drugs, physiotherapy, lifestyle management

Disease: Hepatitis D
Symptoms: headache, skin rash, cough, yellow eyes
Treatment: Antiviral therapy, liver monitoring, supportive care

Disease: Hypothyroidism
Symptoms: joint pain, skin rash, cough, weight loss, yellow eyes
Treatment: Thyroid hormone replacement therapy

Disease: Acne
Symptoms: joint pain, cough, weight loss
Treatment: Topical retinoids, antibiotics, hormonal therapy if needed

Disease: GERD
Symptoms: joint pain, weight loss, yellow eyes
Treatment: Proton pump inhibitors, dietary changes, lifestyle modification

Disease: Peptic ulcer disease
Symptoms: headache, nausea, skin rash
Treatment: Proton pump inhibitors, antibiotics (if H. pylori positive)

Disease: Psoriasis
Symptoms: fever, vomiting, cough, weight loss

Treatment: Topical corticosteroids, phototherapy, immunosuppressants

Disease: Drug Reaction

Symptoms: nausea, vomiting, fatigue, skin rash, yellow eyes

Treatment: Stopping the offending drug, antihistamines, corticosteroids

Disease: Diabetes

Symptoms: fever, nausea, yellow eyes

Treatment: Insulin therapy, oral hypoglycemics, diet control, lifestyle changes

Disease: Varicose veins

Symptoms: headache, vomiting, fatigue, cough

Treatment: Compression stockings, lifestyle changes, surgical intervention if needed

Disease: Hepatitis A

Symptoms: fever, nausea, joint pain, weight loss, yellow eyes

Treatment: Supportive care, hydration, rest, vaccination for prevention

Disease: Hepatitis E

Symptoms: fever, vomiting, joint pain, skin rash, weight loss

Treatment: Supportive care, hydration, rest

Disease: Migraine

Symptoms: vomiting, fatigue, skin rash, cough, yellow eyes

Treatment: Pain relievers, triptans, preventive medications, lifestyle management

Disease: Allergy

Symptoms: joint pain, cough, yellow eyes

Treatment: Antihistamines, allergen avoidance, corticosteroids if severe

Disease: Jaundice

Symptoms: vomiting, fatigue, skin rash

Treatment: Rest, hydration, medication for underlying cause

Hospital: General & Gastroenterology Hospital

Disease: AIDS

Symptoms: headache, nausea, joint pain, skin rash, cough

Treatment: Antiretroviral therapy (ART), opportunistic infection management

Disease: Alcoholic hepatitis

Symptoms: fever, fatigue, yellow eyes

Treatment: Alcohol cessation, corticosteroids, nutritional support
